

ASSISTED PERSONAL COMMUNICATION SYSTEM AND METHOD

Abstract

5 A personal communications system which may be used for a variety of
emergency and non-emergency situations using two-way communication devices and a
bidirectional communication network. In one application two-way pagers are adapted
for use in the system. In one application cellular devices are adapted for use in the
system. In one application an assisted living response center is established using
various embodiments of the present personal communications system. The system
10 provides multiple levels of prioritization. One embodiment provides a method for
receiving, evaluating and responding to calls received from a subscriber.
